Hannah Brooks

Salesforce Administrator → Developer

Phoenix, AZ · hannah.brooks@example.com · salesforce.com/trailblazer/hannahbrooks · linkedin.com/in/hannah-brooks-example

> **Proof:** Platform Administrator + Platform Developer · 4 yrs admin on a 350-user org · Replaced 3 slow Flows with tested Apex

SUMMARY

Salesforce Administrator moving into development. Already writes Apex and Lightning Web Components for my own org, with tests, and knows which problems should stay in Flow.

WORK EXPERIENCE

Salesforce Administrator (developer duties since 2025) **April 2022 – Present**

Copperline Solar · 350 users · Sales Cloud

- Replaced 3 record-triggered Flows that hit CPU limits on bulk updates with one bulkified Apex trigger and tests; 10,000-record loads now run clean
- Built a Lightning Web Component for site surveys on mobile, replacing a paper form for 40 field reps
- Wrote an invocable Apex action so admins can call a credit check from Flow without code changes
- Still own user setup, permission set groups and release notes for every sandbox deploy

PROJECTS

Trailhead: Apex Specialist and Process Automation Specialist superbadges; Platform Developer earned while working full time

SKILLS

Code: Apex triggers, invocable Apex, SOQL, Lightning Web Components, Apex tests

Admin: Flow, permission set groups, validation rules, reports and dashboards

Tools: VS Code, Salesforce CLI, sandboxes, change sets

CERTIFICATIONS

- Salesforce Certified Platform Administrator, 2022
