Tomasz Wierzba

Salesforce Developer

Chicago, IL · tomasz.wierzba@example.com · salesforce.com/trailblazer/tomaszwierzba · linkedin.com/in/tomasz-wierzba-example

> **Proof:** Platform Developer + Platform Developer II · 3 yrs on a 900-user Sales + Service Cloud org · Merged 7 triggers into 1 handler framework

SUMMARY

Salesforce Developer who turns tangled automation into code a team can change safely. Known for trigger frameworks, integration fixes and Lightning Web Components the service desk actually uses.

WORK EXPERIENCE

Salesforce Developer **May 2023 – Present**

Northwind Mutual · 900 users · Sales Cloud + Service Cloud

- Merged 7 Opportunity and Case triggers into one handler framework with recursion guards, making order of execution predictable and cutting save time from 3.4s to 1.1s
- Built a Lightning Web Component case console (Lightning Message Service between 3 components) used daily by 120 agents
- Moved a nightly policy sync to Queueable Apex with a named credential and retry logic; failed syncs dropped from 40 a week to 2
- Added external IDs and upsert to the data load process so imports update records instead of creating duplicates

Junior Salesforce Developer **June 2022 – April 2023**

Elmstead Health · 300 users · Sales Cloud

- Wrote Apex tests and fixed failing deployments across 4 sandboxes; release-day rollbacks went from monthly to none
- Replaced 5 Visualforce pages with Lightning Web Components

SKILLS

Apex: Trigger frameworks, Queueable, Batch, Schedulable, platform events, with sharing

Integration: REST callouts, named credentials, external IDs, upsert

UI: Lightning Web Components, Lightning Message Service, Visualforce

Delivery: Salesforce DX, Salesforce CLI, Git, GitHub Actions, Apex tests

CERTIFICATIONS

- Salesforce Certified Platform Developer, 2022
- Salesforce Certified Platform Developer II, 2024
