Elena Okafor

Senior Salesforce Developer

Atlanta, GA · elena.okafor@example.com · salesforce.com/trailblazer/elenaokafor · linkedin.com/in/elena-okafor-example

> **Proof:** Platform Developer II + JavaScript Developer · 7 yrs Apex/LWC · Led a 2,400-user org's move from change sets to source-driven CI

SUMMARY

Senior Salesforce Developer who sets the patterns other developers follow: trigger framework, selector layer, test data factory and a pipeline that deploys on every merge.

WORK EXPERIENCE

Senior Salesforce Developer **January 2022 – Present**

Harbor & Pine Insurance · 2,400 users · Sales, Service + Experience Cloud

- Moved a 5-developer team from change sets to Salesforce DX, unlocked packages and GitHub Actions; releases went from monthly to weekly with 0 rollbacks in 18 months
- Designed an async claims intake on platform events and Queueable Apex, handling 30,000 events a day with no governor limit errors
- Wrote the team's Apex standards (selector classes, with sharing by default, test data factory) and reviewed every pull request
- Rebuilt the Experience Cloud claims portal in Lightning Web Components; page load fell from 6s to under 2s

Salesforce Developer **March 2019 – December 2021**

Crestline Bank · 700 users · Financial Services Cloud

- Built a REST integration with the core banking system using named credentials and a retry queue
- Raised org test coverage from 76% to 92% by replacing SeeAllData tests

SKILLS

Architecture: Trigger frameworks, selector layer, platform events, async Apex, large data volumes

UI: Lightning Web Components, Experience Cloud, Jest

Delivery: Salesforce DX, unlocked packages, GitHub Actions, code review, PMD
